RE: Monogramming API Specification 20E and API Specification 20F Bolting

In accordance with the marking requirements of API Specification 20E (Clause 8.2) and API Specification 20F (Clause 8.2), which allow for the containerization of bolting less than 1 in. nominal diameter, licensees may now apply the Monogram Mark to the containers. The containers must also identify the applicable license number, the manufacturer's name and date of manufacture as required by the License Agreement.

If additional information or clarification is required, please contact the API Monogram Program at [certification@api.org](mailto:certification@api.org).

Thank you for your continued dedication and support in maintaining the highest quality and product standards throughout the oil and gas industry.

*Together, we can [Power Past Impossible!](#)*

Sincerely,

Sharon Bowie  
Manager of Operations, Monogram/APIQR
