Access to natural gas and oil development will be a key driver of the post-pandemic recovery in California. The industry supported over one million California jobs, provided over \$94.4 billion in wages and contributed more than \$199.2 billion to the state's economy in 2019, according to a study conducted by PricewaterhouseCoopers (PwC) that compiles the latest available government data.

JOBS OVERVIEW

From petroleum engineers and truck drivers to contractors and manufacturers, the natural gas and oil industry supports a wide range of jobs across the California economy. Research shows that every direct job in the natural gas and oil industry generates an additional 5.4 jobs in California.

Good jobs mean community-supporting wages that are spent on homes, at local restaurants, car dealerships and small businesses.

MORE THAN \$199.2 BILLION IN ECONOMIC IMPACT

Industry activity boosts manufacturing, logistics, banking and construction among dozens of other economic sectors.
